A.t Unit: 1651

1. Receipt is acknowledged of the response to the restriction requirement filed May 02, 2003.

- 2. Claims 1-20 are pending in this application.
- 3. Applicant has elected Group I, claims 1, 3-16 and 18 for examination.

Claims 2₇17 and 19-20 have been withdrawn from consideration as drawn to separate and distinct inventions.

The restriction requirement is proper as stated in the previous Office action.

The restriction requirement has been made FINAL.

- 4. The sequence listing has been approved on August 22, 2002 [Paper No. 11].
- 5. The following is a quotation of the first paragraph of 35

U.S.C. § 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The specification is objected to under 35 U.S.C. § 112, first paragraph, as failing to provide an adequate written description of the invention, failing to provide an enabling disclosure and failing to present the best mode contemplated by applicant for carrying out the invention without complete evidence either that the claimed biological materials are known and readily available to the public or complete evidence of the deposit of the biological material.

Page 3

Application/Control Number: 09/938,035

Art Unit: 1651

The specification lacks complete deposit information for the deposit of the strains as noted in claim 6. Because it does not appear that the strains can be reproducibly isolated from nature without undue experimentation and because the best mode disclosed by the specification requires the use of the strains, a suitable deposit for patent purposes is required.

Applicant's referral to the deposit in the specification is an insufficient assurance that all required deposits have been made and all the conditions of M.P.E.P. 608.01(p)(C) met.

If the deposits were made under the provisions of the Budapest Treaty, filing of an affidavit or declaration by applicants, assignees or a statement by an attorney of record over his or her signature and registration number stating that the deposits have been accepted by an International Depository Authority under the provisions of the Budapest Treaty, that all restrictions upon public access to the deposits will be irrevocably removed upon the grant of a patent on this application and that the deposit will be replaced if viable samples cannot be dispensed by the depository is required. This requirement is necessary when deposits are made under the provisions of the Budapest Treaty as the Treaty leaves this specific matter to the discretion of each State. Amendment of the specification to recite the date of deposit and the complete name and address of the depository is required. As a possible means for completing the record, applicant may submit a copy of the contract with the depository for deposit and maintenance of each deposit. If the deposits have not been made under the provisions of the Budapest Treaty, then in order to certify that the deposits comply with the criteria set forth in M.P.E.P. 608.01(p)(C), items 1-3 regarding availability and permanency of deposits, assurance of compliance is required

Thus, it is apparent that the strain(s) is (are) required to practice the claimed invention(s) as recited in the claims. As a required element it must be known and readily available to the public or obtainable by a repeatable method set forth in the specification. If it is not so obtainable or available, the enablement requirements of 35 U.S.C. 112, first paragraph, may be satisfied by a deposit of strain(s). See 37 C. F. R. 1.802.

The specification does not provide a repeatable method for obtaining the strains and it does not appear to be a readily available material. Deposit of strains would satisfy the enablement requirements of 35 U.S.C. 112. If a deposit has been made, Applicant is required to meet the necessary criteria of the deposit rules in accordance with 37 CFR 1.801-37 CFR 1.809.

If a deposit has not been supplied or made under the Budapest Treaty, then an affidavit or declaration by Applicants or someone associated with the patent owner who is in a position to make such assurances, or a statement by an attorney of record over his or her signature, stating that the deposit has been made under the terms of the Budapest Treaty <u>and that all restrictions</u> imposed by the depositor on the availability to the public of the deposited material will be <u>irrevocably removed</u> upon the granting of a patent, would satisfy the deposit requirements, See 37 CFR 1.808.

Application/Control Number: 09/938,035

Art Unit: 1651

c) the deposit will be maintained for a term of at least thirty (30) years and at least five (5) years after the most recent request for the furnishing of a sample of the deposited material;

d) a viability statement in accordance with the provisions of 37 CFR 1.807;

and

e) the deposit will be replaced should it become necessary due to inviability, contamination or loss of capability to function n the manner described in the specification.

In addition, the identifying information set forth in 37 CFR 1.809(d) should be added to the specification, See 37 CFR 1.803-37 CFR 1.809 for additional explanations of these requirements.

- . Such assurance may be in the form of an affidavit or declaration by applicants or assignees or in the form of a statement by an attorney of record who has authority and control over the conditions of deposit over his or her signature and registration number averring:
 - (a) during the pendency of this application, access to the deposits will be afforded to the Commissioner upon request;
 - (b) <u>all restrictions upon the availability to the public of the deposited biological material will be irrevocably removed upon the granting of a patent on this application;</u>
 - (c) the deposits will be maintained in a public depository for a period of at least thirty years from the date of deposit or for the enforceable life of the patent of or for a period of five years after the date of the most recent request for the furnishing of a sample of the deposited biological material, whichever is longest; and
- (d) the deposits will be replaced if they should become nonviable or non-replicable.

Amendment of the specification to recite the date of deposit and the complete name and address of the depository is required. As a possible means for completing

Art Unit: 1651

the record, applicant may submit a copy of the contract with the depository for deposit and maintenance of each deposit.

Claims 1, 3-16 and 18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention with respect to the microorganism(s) as noted above.

Upon receipt of a <u>statement of availability</u>, the above rejections will be withdrawn.

- 5. No anticipatory art has been found. In addition, the references do not suggest or motivate one to employ the claimed process.
- 6. No claim is allowed.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Examiner Lilling whose telephone number is** (703) 308-2034 and **Fax Number** is for applications **Before Final** (703) 872-9306 and **After Final** for applications is 703-872-9307 or SPE Michael Wityshyn whose telephone number is (703) 308-4743. Examiner can be reached Monday-Thursday from about 5:30 A.M. to about 3:00 P.M. Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0196.
